

Failed to install IAR pack files automatically

Questions:

When the user installed several different versions of IAR, the IAR_AT32F403_AddOn failed to automatically install the Pack files.

Answer:

The user is not running the program as an administrator, so that only one installation path is enumerated when IAR_AT32F403_AddOn performs automatic search, causing that it is not the desired IAR version path to install pack files.

Solutions:

1. Run the program as an administrator;
2. Manually select the correct IAR path where the pack file needs to be installed, otherwise, IAR still cannot identify AT32 part number after the completion of installation. (under the directory with arm and common files)

Type: Development tool

Applicable products: All MCUs

Main function: None

Minor function: None
